Software developer — products, platforms and AI tools.

Trained at 42 Paris and UVSQ, I build applications end to end, from architecture and APIs to interfaces, integrations and deployment, for clients and for my own products, often remotely alongside technical and creative teams.

Education

42 Paris | Computer science curriculum (Common Core – Level 10) 2022 – 2024

42 Paris | Piscine (selection bootcamp, ~5% acceptance rate), top 30 out of 900 March 2020

ISTY (UVSQ) | Engineering program (cycle ingénieur), Computer Science 2017 – 2019

UVSQ | DUT (two-year technical degree) in Electrical Engineering & Industrial Computing 2015 – 2017

Cours Sainte Marie de Hann | French Baccalaureate, Science track

Stack & tools

Languages | C/C++, TypeScript, Python, PHP, Rust, Java, HTML/CSS, SQL

Frameworks | NestJS, Node.js/Express, Nuxt

Frontend | Vue 3, React.js, Electron, Tailwind

Data & delivery | Docker, Supabase, Vercel, GitHub/GitHub Actions, DigitalOcean/AWS, EAS, PostgreSQL

AI tools | Codex, Claude platform, open-weight models (Nemotron, Qwen) on NVIDIA Brev, Mobbin MCP

Hackathon wins

Galsen Dev Open Source × AI 2026 | 2nd place, Education & learning track, with Tandemcode Oct 2026

Code & Chain Dakar 2026 (Bitnob) | Bronze prize (3rd place), with BitBounty Oct 2026

GOMYCODE × NVIDIA 2026 | 3rd place in Senegal, Real-World AI Impact Award, with Rundown Sep 2026

Selected client projects & products

Tandemcode | Highly interactive, open-source agent orchestrator | tandemcode-app.vercel.app 2026

- Work with your agents without interrupting them: your code as a map, and a Scratchpad to annotate screenshots, ask questions and take notes.
- Tandem mode, for learning and exploring the decisions and constraints behind a problem.
- Ships with its own agent and also runs others like Claude Code; plug in any model, from Claude to open-weight models.

CyberLab | Built for Reporters Without Borders (RSF) | cyberlab.sine.sn 2026 – present

- Developed a cybersecurity awareness platform for designing and running email and SMS phishing simulations.
- Detailed campaign tracking, a training-module builder, transferable admin and learner roles, and secure sending through your own providers and custom domains.

Rundown (ex-Brainstorm) | Live map of AI coding agents | rundown-dev.vercel.app 2026

- Built in one afternoon with a lead Claude Code agent and four subagents, then shipped as a Claude Code plugin.
- Follows Claude Code sessions live and maps the codebase they edit; Nemotron on an NVIDIA GPU summarizes every file (81k lines in 73 s for $0.02).

BitBounty | Bitcoin fintech: paid bounties on GitHub issues | bitbounty-app.vercel.app 2026

- Captained a team of four over 24 hours, coordinating 80+ issues and pull requests and contributing over half of them.
- Maintainers fund bounties over Lightning through Bitnob; developers are paid in sats as soon as their fix is merged.

Selected client projects & products — continued

TheQuestBoard | Where artists find paid commissions | thequestboard.co 2023 – 2026

- A live board of art opportunities from 16 sources, Reddit communities and job boards, with Reddit checked every 10 minutes.
- Personalized Discord alerts by DM or server; hosted online, with scrapers, an API and PostgreSQL.

Multiprise | Control center for development servers, on macOS | multiprise.vercel.app 2026

- Run all your development servers from one window: it finds what each project can start, gives every service a port that never clashes, and keeps logs and previews side by side.
- Coding agents use it too, through a CLI and an MCP server, so they reuse running services instead of starting duplicates.

SkinDiff | Social lookbook for League of Legends | skindiff.lol 2026

- Players bring their skin collections and compare them with friends to find matching looks for duos and five-player teams.
- A line finder shows which skin series a group of champions share; public profiles with Discord sign-in.

Professional experience

MINAPRO AI Executive Catalyst | Full-stack Developer | Remote 2025 – 2026

- Built an AI-driven, adaptive onboarding platform for senior executives, with several tracks tailored to each participant.
- Analytics, admin dashboards and Gmail integration for the team running the program.

TousLesPros | Full-stack & Mobile Developer | touslespros.sn 2026

- Rebuilt a professional discovery portal from the ground up, with authentication, a directory, search, profiles, favorites, and ingestion of opportunity listings.
- Built the Expo iOS/Android app with offline caching, maps, social sign-in, secure sessions, push notifications, and EAS builds.

GAINDÉ 2000 | Software Developer Intern

- Gained hands-on experience in a professional setting at GAINDÉ 2000 through a software development internship.

Volunteering

Git Peer Class | Bilingual workshop at 42 Paris 2022

- Designed and led an open workshop, on campus and online, covering Git fundamentals, branching, merge conflicts, and collaborative contribution.

Association l'Arche d'Isaac | Volunteer March 2024

- Took part in the association's activities and helped organize them.

Other professional experience

Illustration & concept art | Riot Games Apr – May 2026

Visual development | QuasiReal Publishing (freelance) Nov 2023 – present

Visual development | Skytale Feb 2024 – Feb 2025

Illustration & concept art | Azarel Games Jul – Oct 2025

Storyboarding | Wolfpack Games Studio Feb – Jul 2025
